

## List of questions for the Research and Collaboration Proposal

Shortlisted candidates are asked to provide a Research and Collaboration Proposal detailing the proposed collaboration with one or more German host institution(s) (max. of fifteen pages, including references) and submit it via the online platform of the Max Planck-Humboldt Research Award.

Please take the following list as suggestions of topics you may want to address:

1. Please provide details on the scientific project and elaborate, why it is scientifically significant and innovative.
2. Please describe your planned work program.
3. Why have the proposed host institution(s) been chosen and how do you plan to collaborate with your German host(s)?
4. To what extent will the project build on any existing collaborations and how would a sponsorship through the Max Planck-Humboldt Research Award expand or enhance such relations? What synergies are expected?
5. What are the chances of success of the proposed project and how would you measure the success of your project?
6. What impact would a sponsorship through the Max Planck-Humboldt Research Award have for you and the host(s)? Do you expect innovative impulses for the research area?
